August 16<sup>th</sup>, 2013

To Whom it May Concern:

Actizyme

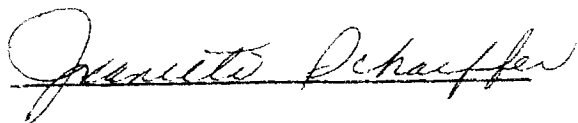

In 2012 it was noted that our lagoon had a serious problem with a sludge mound that rose above the water. We were very concerned that the outlet would block up and cause the lift station to backup.

We contracted a company that would remove the sludge. They quoted the Village a cost of \$60,000 plus the cost of digging a sludge pit.

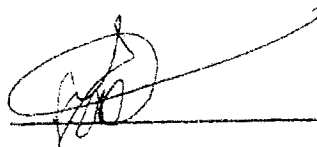

Council could not decide what to do as the cost was much more than anticipated. Then our town Foreman Garth met with an Actizyme rep and convinced Council to try their product.

The Actizyme program was started on May 7<sup>th</sup>, of 2013 and by July Garth noticed a huge difference. The product was working beyond his expectations and even with the relatively cool summer it was still working well.

Council is very pleased with Actizyme and are definitely committed to continuing with this product. This product has saved the Village of Vibank thousands of dollars.
